Description

Fire Brigade is a set of miniature rules to be used to fight World War II battles. The combat system focuses on unit cohesion rather than casualties, giving a more realistic portrayal of warfare, where victory is usually won by wearing out the enemy rather than annihilating him.

Units represent companies of infantry or platoons of armor. Each inch represents 100 yards of historical terrain. Statistics on all important AFVs and artillery are provided, as well as a wide variety of Order of Battles for all major powers.

Fire Brigade only comes with rules, dice and miniatures must be purchased separately.
