Number of Players: 2 or more
Complexity: Simple to Moderate
Estimated Game Time: 40 minutes to many hours
Rule Book: not included, see below
Supplements: see below
Board Size: not included
Number Counters: 5 pewter star ships

Description

Squadron Box #23 contains 5 pewter, 1/3788 scale space ships from the Star Trek Universe. They come with plastic stands to give the appearance of flying. Some ships and the stands require minor assembly. The ships are unpainted.

A streamlined version of Star Fleet Battles, Federation Commander lets players take control of

every ship of the Star Trek Universe. Federation Commander has two sets of combat rules, the simplified Fleet game, intended for large battles, and the more detailed Squadron rules, giving players more control over individual ships.

The Federation Commander system is vast, with many modules and accessories available. There are several core games available, each being a complete game by itself. Supplements add additional ship designs and rules to the game, but require one or more core games to play. A large line of miniatures is available, suitable for display as well as for game play.

The miniatures are suitable for display, or they can be used in the Federation Commander or Star Fleet Battles games.

Ships that are included are:

- Romulan SeaHawk police ship
- Gorn Police Frigate
- Small Freighter (Q ship)
- Orion Double Raider
- Orion Battlecruiser
